Pet Insurance

Exams, X-Rays, Specialists...oh my! With ever advancing pet care options comes increased costs to keep your pet healthy. If your pet is a beloved member of your family, then pet insurance may be right for you.

At East Padden Animal Hospital, we know choosing a pet insurance company is both important and confusing. Here are a few tips to ask the insurance company before signing up:

- What is the deductible?
- What are the policy limits?
- What does the policy cover and what are the available options (wellness, emergency, cancer care)?
 - Do they cover things like Acupuncture, Prescription Diets and Therapeutic Laser?
 - How do you file a claim and what is the reimbursement policy?
 - Can you choose a vet or are you restricted by a network?
 - Who determines your pet's treatment – the vet or the insurance provider?
 - What is excluded?
 - Are there Pre-Existing Conditions?
- Is the company licensed in your state?

There are a lot of Pet Insurance Companies out there to choose from now. At East Padden Animal Hospital, our favorite company is Trupanion! They are a local company based out of Seattle who have really broken the mold when it comes to truly caring about animals! They have very reasonable policies and simple, easy plans that do pay out. Check them out at www.trupanion.com to find out more about them.
